

GEORGE F. PINDER ???!

William Gray, University of North Carolina at Chapel Hill, 919-966-3013, GrayWG@gmail.com

1. William G. Gray, University of North Carolina at Chapel Hill

Professor George F. Pinder's distinguished career as a hydrologist has been marked by a willingness to ask important questions, to encourage others to find answers to those questions, and to find answers himself. Professor Pinder's curiosity about the way systems work has led him to conduct research on theory, simulation, experiments, and field methods. Additionally, he has inspired colleagues and students by his energy, optimism, and genuine interest in hydrologic systems. In this presentation, the impact of some of George's contributions as a scientist and mentor are indicated as well as work that he has inspired.
